

# PROMOFLAG™ PRICE LIST 2006

## NEW HIGH RESOLUTION SUPER VIBRANT PRINTING

PromoFlags™ are the latest product to hit the outdoor promotion market. They get your message out with a system you can set-up in minutes without electricity. Available in 8ft, 12ft & 15ft sizes with a variety of mounting options. The flag rotates on sealed bearings so flag does not wrap around pole and flag is locked into base by a steel pin so it can't be taken out by the wind or vandals. The pole system is built with 3 pieces of aluminum pole that is connected together with shock cord with a stainless steel whip that inserts at top. The PromoFlag™ design is made so that the flag stays readable even when there is no wind and with even a slight wind it waves gently to attract your eye.
